

# On The Subject Of Milking Mischboozl

*If you're looking at this manual, you're probably doing this as a last resort. I don't fully recommend usage of this alternative manual, but if you *\*really\** need to look for specific glyphs, that's perfectly fine...*

**NOTE: This manual assumes you know how the module works. Refer to the original manual for instructions.**

Order: X#, A/B/C/D/E

X = A letter  
# = A set number  
A = Squares  
B = TL corners  
C = TR corners  
D = BL corners  
E = BR corners

- Glyphs are sorted by the number of full squares.
- Unique glyphs (ones that don't share matching amounts of squares or specific corners) are inverted in color.
